Cavanagh Hooper Dolan Insurances Ltd is
regulated by the Central Bank of Ireland

Skipper Expo International Galway 2019

10am - 6pm Fri / 10am - 4pm Sat

Welcome

STAND
8A

The Mara Media Team

Welcome to the 15th anniversary Skipper Expo Int. Galway fisheries show!

Sponsored by BIM and Cavanagh Hooper Dolan Insurances Limited, the 2019 expo will feature over 100 exhibitor stands covering virtually every equipment and service sector for the fishing industry.

From humble beginnings, the Galway show is more than double the size it was compared to the first event 15 years ago, but the one factor that has remained constant over the years is the friendly atmosphere combined with its proven track record of being a great place to do business.

As well as the excellent turnout from visitors from fishing ports throughout Ireland, there is always a strong visitor presence from Scotland and other parts

of the UK, as well as from the rest of Europe. Star attractions for the 2019 expo will include boat displays, pool safety demos hosted by the RNLI and the highly popular exhibitor's seafood buffet and music night on Friday 8 March, which this year is sponsored by Fibras Industriales SA, who are commercially known as FISA.

FISA are a leading producer and distributor of fishing nets, ropes and twine with more than 70 years of experience in the fishing and aquaculture industries.

Fishing and the wider seafood industry are an important part of the Irish economy, supporting jobs in fragile rural communities. There is, however, great uncertainty what the future holds for the Irish industry with Brexit looming

rapidly on the horizon. Let us hope that common-sense prevails and a fair and equitable agreement is reached that maintains fishing opportunities and ensures the easy trade of seafood across international borders.

But what is not in doubt is the great resilience of the Irish fishing industry and its ability to innovate to ensure that the sector continues to grow in terms of overall seafood sales and exports. Ireland is renowned around the world for the quality and range of seafood sustainably harvested from our seas. It is that commitment to quality that has proved so beneficial to the industry in

recent years.

I would like to give a special thanks to our show sponsors, BIM and Cavanagh Hooper Dolan Insurances Limited – their support is hugely appreciated.

The team here at Mara Media has been overwhelmed by the huge interest in Skipper Expo Int. Galway 2019. We sincerely hope you have an enjoyable and productive show and I look forward to meeting with as many of you as possible over the two days of the expo.

Sharon Boyle,
Commercial Fishing Manager

A promotional graphic for the Skipper Expo Int. Aberdeen 2019. It features a central map of the UK and Ireland with a red dot on Aberdeen. The text 'SKIPPER EXPO INT. ABERDEEN' is written around the map, and '17-18 MAY 2019' is written below it. To the left, there are three inset photos: a man looking at a boat model, a man looking at a seafood display, and a group of people at a seafood buffet. The text 'SAVE THE DATE 17-18 MAY 2019' is written in large yellow letters over the photos. At the top left is the AECC logo (Aberdeen Exhibition & Conference Centre). At the bottom, there is a blue banner with 'COMMERCIAL FISHING EXHIBITION' and 'NEW OPENING HOURS FRI 10AM - 6PM SAT 10AM - 4PM'. Below that is the website 'WWW.MARAMEDIA.IE', the email 'sharon@maramedia.ie', and the phone numbers 'M: 00353 (0)86 8401250 T: 00353 (0)74 9548037'. At the bottom right are the logos for 'mara media', 'THE FISHING SHOW', 'SKIPPER EXPO INTERNATIONAL', and 'SKIPPER'.

BIM returns as headline sponsor for Skipper Expo Int. Galway 2019

Jim O'Toole BIM CEO.

Bord Iascaigh Mhara (BIM), Ireland's seafood development agency is returning to this year's Skipper Expo Int. Galway. BIM is a proud sponsor of the annual trade show for the fishing sector.

2019 will be marked in history as a highly challenging and uncertain year for the Irish fishing fleet. The aim of BIM activities

at this year's show is to communicate the high level of support and expertise on offer from BIM to the sector.

March 2019 is almost one year on from the launch of BIM's new corporate strategy. The fishing sector, fish farming and seafood processing are widely recognised as sectors with significant potential for growth. BIM will

administer an extensive work programme for the seafood industry under the European Maritime and Fisheries Fund and will work alongside its partner agencies to deliver on Food Wise 2025 and on the ambitions set out in the Harnessing Our Ocean Wealth plan.

The fishing sector in Ireland has shown great resilience and

a remarkable ability to adapt to changing economic and political circumstances. The message to visitors at this year's show is that BIM is here to support you and to help sustain and grow your business into the future.

BIM will have a strong presence at this year's show, including an impressive display model of selective gear. The display will take centre-stage and will be positioned in the lobby of the Galway Bay Hotel.

BIM has been working closely with members of the Irish fleet to develop selective gear technologies to address new Landing Obligation regulations and to reduce levels of unwanted catches. Underwater footage taken during BIM gear trials will play on screens next to the large-scale display during the two day event. This will allow visitors to Skipper Expo Int. Galway to see the gear in action and to talk to BIM staff about the

trials and to learn more about how the gear can work for them.

Visitors attending this year's show will be actively encouraged to sign up to the Clean Oceans Initiative. Minister for Agriculture, Food and the Marine, Michael Creed TD launched the major new national initiative to help tackle the problem of marine litter at Union Hall last month. BIM aims to have every fishing vessel in Ireland participating by the end of 2019 as part of the national initiative. A team from BIM will be on hand throughout the two-day event to provide support and relevant information to visitors on grant aid, including the new fishermen's scheme, sustainable fishermen part B, and the safety scheme. Information on training grant aid will also be available at this year's event.

The BIM coastal training unit will be on site all weekend. The training schedule for the mobile

unit will be available to visitors to the show, including details on how to book. Free copies of BIM's latest fisheries management chart will be available. An online version of the much-used chart is currently being developed. The digitisation of the chart will allow for greater levels of interactivity and more in-depth information for the fleet. BIM's 2018 Business of Seafood report will also be available at this year's event.

To learn more about BIM's range of supports, please come and talk to the BIM team at our exhibition stands I'm looking forward to this year's Skipper Expo Int. Galway and to meeting as many men and women from the sector as possible.

Jim O'Toole
Chief Executive

CHD – Proud Sponsors of Skipper Expo Int. Galway

Cavanagh Hooper Dolan Insurances – proud sponsors of Skipper Expo Int. Galway 2019

We are delighted to sponsor Skipper Expo Int. Galway 2019, especially since Cavanagh Hooper Dolan Insurances has had a long association with the fishing and marine industries.

The Cavanagh Family have been involved in the insurance industry since 1943. During our 75 years in business, we have developed bespoke insurance packages to cater for our clients' needs and provide a 24/7/365 claims service to our marine customers. Cavanagh Hooper Dolan

Insurances is part of the Hooper Dolan Group, one of the largest wholly Irish owned insurance brokerages. The group has 12 offices around Ireland.

Our staff at Cavanagh Hooper Dolan Insurances take pride in our work; we always strive to go the extra mile for our clients. Cavanagh Hooper Dolan Insurances is a unique company with specialist marine knowledge and history. Both Cavanagh Hooper Dolan Insurances' new and existing clients can expect to receive invaluable insurance advice and the highest standard of service.

I have over 35 years working in the

insurance industry and have strong connections with the marine industry in both my personal and professional life. I have been a member of the Irish Coast Guard for 30 years. Throughout my careers in both insurance and the Coast Guard, I have gained a unique insight into the insurance needs of the marine industry and companies with ties to marine trades. This has enabled our company to provide bespoke advice to clients regarding the insurance covers they require and, in some cases, providing advice for implementation of health and safety procedures which have resulted in improved premiums.

We provide a comprehensive and competitive range of professional products and services to both individuals and companies. Services include a wide range of marine and general insurance products for all classes of vessels and onshore business in all sectors of the industry. Cavanagh Hooper Dolan also provide a broad range of home, motor and health insurance products and have clients based in both ROI and UK.

The Cavanagh Hooper Dolan team have been attending the Skipper Expo since its inception, and we use this premier two-day event as an opportunity to meet with existing clients and also to meet with prospective new customers. Our fully qualified staff will be at their stand

to discuss any enquires regarding the wide range of insurance products we have available. In addition to providing information on our marine insurance products, we will have information on various other insurance products such as home, motor and the many other business needs. The Cavanagh Hooper Dolan stand is a 'one stop shop' for all your insurance needs - afloat or ashore.

I hope you enjoy Skipper Expo Int. Galway 2019.

Charlie Cavanagh

FISA – A leading producer and distributor of fishing nets, ropes and twine

BUFFET SPONSORS

Fibras Industriales S.A, commercially known as FISA, is a leading producer and distributor of fishing nets, ropes and twine with more than 70 years of experience in the fishing and aquaculture industries.

The constant research and innovation in its production processes, allows FISA to offer products with the highest standards of quality and services developed to satisfy different needs. The latest technology netting looms, machinery, treatment plant, and its experienced personnel, allows FISA to produce durable and consistent products.

FISA manufactures a full range of nets made of Nylon, Polyester, and high-density Polyethylene (HDPE). Products include: Knotless Raschel netting, Twisted Knotted netting,

Supra netting weaving machine

Braided Knotted netting and Twisted Knotless Shogun netting; all for use in trawl and purse seine nets, fish cages, anti-predator nets, anti-bird nets, sports nets and more.

Among all of its products, FISA is proud to offer its customers SUPRA Advance netting. SUPRA are braided knotted nets produced with 3rd generation high-density Polyethylene. Among all its features, the ones that stand out are its lighter weight, higher break strength, high tenacity and less water absorption and fouling impregnation. This product line is directed to compete in the international market, mainly in trawl fishing and aquaculture as rigged cages and predator nets. It is commonly used in purse seine fishing as well.

FISA 's Ropes are manufactured from different raw materials such as Nylon,

Supra product

Polyester, Polyethylene, Polypropylene and various mixtures of these materials.

FISA's Polytar ropes are made of high tenacity Polyester with high abrasion resistance. It is coated with a tar solution developed by FISA that will work as a lubricant when squeezed during manoeuvring. Polytar Rope is highly resistant to abrasion and breakage.

FISA offers customised products based on specific needs. As such it can produce products in special colours and can adjust number of twists per

meter for its braided and twisted nets as well as for its ropes.

The constant research and innovation in FISA's production processes allows it to offer customised products with the highest standards of quality and services developed to satisfy customers' needs.

FISA has a team of qualified engineers and personnel experienced in the designing and assembling of nets, based on customer needs. FISA has decades of experience building purse seine nets, aquaculture cages, bird-nets, predator nets, and more.

NOTHING COMPARES TO AQUAMESH®

Aquamesh® is manufactured using an exclusive hot-dipped zinc galvanised after welding (GAW) and specialized PVC coating method. The wire is first welded and then galvanised with a heavy zinc coating that completely covers and seals the welds, protecting it from all harsh environmental elements. The wire is then covered with our proprietary marine-grade PVC coating. The Aquamesh® manufacturing process results in a longer lifetime of use, typically 5x-10x times more when compared to galvanised before welding (GBW) marine products.

Safe Seas – Connected Coasts

STAND

84

The mission of Irish Lights is safe navigation at sea. Some of the key services they provide include:

- Provision and maintenance of 340 General Aids to Navigation (AtoN)
- Inspection of 3,200 Local Aids to Navigation and audit of 60 Local Aids to Navigation Authorities
- Marking or removing dangerous wrecks outside harbour areas around Ireland
- Navigation Risk Assessment and Advice
- Provision of Statutory Sanctions for marking

- of offshore structures Advice and information on Aids to Navigation and marking of offshore structures and hazards (including to the aquaculture and offshore energy sector)
- Sea state and environmental data (wind speed and direction, wave height and direction, humidity).

To learn more see <https://www.irishlights.ie/technology-data-services/data-services>. Irish Lights can also customise data collection at selected sites. Mark Devlin, Operations

and Navigation Services. Irish Lights said: “Ensuring buoys are operating well, marking channels and marking dangers are some of ways we protect those fishing. We are currently undertaking a review of Aids to Navigation around the coast and the fishing industry is invited to contribute to this review to ensure the right level and mix of aids are provided. Please call to our stand and give us your feedback.”

Irish Lights also provides a suite of commercial services including data, technology, and engineering and navigation advice and consultancy. They also charter the Granuaile to support offshore activities.

Mackerel setups from DMG Welding

STAND

42

DMG Welding has been a regular visitor to the Skipper Expo Int. Galway where their mackerel strippers have proved popular.

The company came up with the design seven years ago and trials have shown

the strippers to work very well. Many fishermen have turned to line fishing over the last few years and the company’s strippers have been sent to customers in the UK, Scotland and Faroe Islands.

DMG Welding is busy working on a lot of smaller inshore boats up to 15m, supplying potting rollers, full mackerel setups, including various jiggging machines, and custom anchors and grapples.

Recent jobs completed by Galway exhibitor Astander

During 2018, new projects on fishing vessels were carried out by Astander shipyard. These included:

Renewal of bulbous bows on sisters pelagic vessels “FATHER MACKEE” and “BRENDLELEN”.
(Irish Republic)

Two sister pelagic fishing vessels from Ireland entered the Astander drydock no 2 to renew their bulbous bows and to carry out regular drydocking jobs. It is the second visit of Father McKee after her first docking in Astander in 2016, and this time bringing the sister vessel Brendelen with her.

The new bulbous bows were built in their workshop with the technical information and drawings provided by Atlantek Maritime, the Irish Naval Architect Design Office appointed by the owners. The new design will enhance vessels behaviour in rough seas.

“AKRABERG”
(Faroe Islands)

AKRABERG has been the first vessel to arrive from Faroe Islands in the history of Astander, showing that the distance is not always such a bad thing!

- Main jobs performed included:
- Full blasting and painting of hull,

STAND

68B

decks, superstructure, and deck machinery; including zinc spray of trawl gallows frame, ramp & trawl deck.

- Overhauling of main engine, bow and stern thrusters.
- Upgrading of electronic systems on bridge and accommodation area.
- Pipework.
- Works in fish factory.

Main engine repairs on “LOVON” (Irish Republic)

A new foundation, and additional modifications in engine room were carried out.

A very strong commitment to customers based on fair-play, flexibility and transparency, is established with each and every new customer from the very first contact, making things easy-going to the end and resulting

in the yard’s main strength: Customer Satisfaction.

The special needs requested by fishing vessels and fishing vessel owners match perfectly with the yard’s capabilities and the way business is understood at Astander.

Astander, with more than 140 years of experience in the ship repair industry is located in the Port of Santander (Bay of Biscay), on the Northern coast of Spain.

Absolutely competitive prices and unbeatable delivery times, together with a convenient location and better weather conditions than those in countries further north present Astander as the perfect alternative to the traditional pilgrimage destinations of the international fishing fleet when time comes for maintenance or special projects in Europe.

New innovative robotic blast cleaning equipment from Peter Bruce (Patsy) Ships Painters

Peter Bruce (Patsy) Ships Painters – Stand Number 25 at Skipper Expo Int. Galway 2019 – are looking forward to welcoming visitors and promoting their new innovative robotic blast cleaning equipment in Galway as well as other new UHP water blasting techniques of which they are the first to successfully introduce to the fishing industry.

PBP are the sole UK supplier of world leading German deck and flooring resin Degafloor and regularly install to fishing industry with installations successfully completed in UK, Ireland, Denmark and Norway onboard multiple areas of fishing vessels, decks and floors which have left customers highly impressed with quality, durability and fast turnaround/cure times of applications.

As well as blast cleaning, hot metal zinc spraying and painting of vessels around the ports of Scotland, PBP were delighted when the Westbound Owner, Eamon McHugh, contacted them to fully blast clean and paint Westbound during her summer refit. Jonathan and Pat Bruce, Peter's sons, and their dedicated team were already working in Killybegs for numerous other vessel owners at the time.

PBP Services worked

very closely with the owners SeaQuest, Mooney Boatyard and the shiphall operators in order to deliver an anticorrosive cleaning and 5 coat paint spec to the very highest of quality standards. Working 7 days each week 12 and 24 hour shifts, PBP blast cleaned the Westbound back to the bare metal and with the support of the SeaQuest team continued to hot metal zinc spray all steelwork on topsides and to inboard deck surfaces and superstructure inside the Killybegs Shiphall.

Once metallisation was complete then 2 full coats of 2 pack primers were applied, followed by full coat of epoxy base coats then finished with 2 pack polyurethane topcoats in order to leave the Westbound with a superb finish using the highest quality materials during the project. The owners were 'delighted with the quality, efficiency and value for money and would recommend PBP Services to any future customers'.

In December 2018, PBP set up a store in Killybegs purely operating for customer and contact needs, to hold blast cleaning and painting equipment to rapidly mobilise their dedicated team to carry out various works in 2019 once again for Irish customers in Clogherhead, Howth and New Ross onboard trawlers they have previously painted

by PBP in these ports.

As well as UK and Ireland, PBP have now been setup in Skagen for 4 years where they are often called to service Scottish, Irish and Shetland pelagic and white fish trawlers during their summer refits. From the PBP base in Skagen, they have all equipment required for blast cleaning and painting operations and often mobilise to ports such as Fredrikshavn, Hanstholm and Thyboron, where they also provide services to Danish and Norwegian customers with whom they have excellent working relations.

PBP are preparing for another busy year ahead and welcome enquiries at the Galway Show or alternatively Peter can be contacted directly on 07831 260109; email info@pbpservices.co.uk or via the office on 0044 (0)1346 514056.

Riverdale Mills' Aquamesh® is technologically advanced and multifunctional

Riverdale Mills will once again be exhibiting at Galway where they will be displaying Aquamesh® - the only marine wire mesh engineered for ocean use, and manufactured to ensure a sturdier, weather and corrosion resistant lobster pot. The durability of Aquamesh® goes a long way to keeping costs down and businesses profitable.

Manufactured in the United States by Riverdale Mills, Aquamesh® is manufactured from high-grade premium steel that is hot-dip galvanized after welding with a thick layer of zinc around the weld to prevent the steel from corroding. The wire is then covered with a proprietary marine grade PVC coating that forms a protective layer to prevent the wire from peeling or stripping in harsh salt water fishing conditions.

"Aquamesh® is an incredibly versatile product that holds strong in Ireland's harsh, rocky bottom oceans," says Pat "The Chief" O'Donnell. "The lobster and offshore crab pots made with Aquamesh® fish as well and often times better than the old creels."

Aquamesh is a multifunctional product. It is used worldwide in the construction of lobster and crab pots, oyster and shellfish

trays, and conch and whelk traps and fish pens, and is available in a variety of patterns that can easily be fabricated into numerous configurations. Standard mesh size is 1.5 x 1.5, 10.5. Widths range from 6"/152mm to 57"/1,448mm. Aquamesh's proprietary marine-grade PVC coating is offered in yellow, green, and black colours. Aquamesh® is also available in a heavy 8-gauge ½ x 3" mesh. The heavier gauge mesh issued for constructing the base of the lobster pot, holds pots on the ocean floor, thus reducing the wear and tear often caused as pots travel the rocky bottom waters off the shores of Ireland and the U.K. Riverdale Mills proprietary marine-grade PVC coating is offered in yellow, green, and black.

Riverdale also offers annealed, stainless and galvanized steel hog rings, made from high-quality steel,

and handcrafted, 54" and 60" wire mesh benders. Both products are manufactured in-house by Riverdale Mills.

Riverdale Mills CEO Jim Knott Jr. and his team are committed to producing technologically advanced and sustainable premium products to fishermen and women. "We are honored to be a part of this dynamic industry and are committed to providing our clients with superior quality products and customer service."

Riverdale Mills revolutionized the lobster fishing industry in 1980 when the company designed and created Aquamesh to build a more durable lobster trap for New England lobstermen. Today, over 75 percent of all lobster traps around the world are built with Aquamesh.

All Riverdale Mills products are made in the United States. (www.riverdale.com)

Tyson's opens new chandlery and online store

Galway exhibitor Tyson's Ships Riggers Ltd has announced the launch of their new chandlery and online store.

Jonathan Tyson of the company said that the industry has seen changes in ordering habits of fishermen and that fishermen want flexibility in ordering outside of the working 9am – 5pm day. Tyson's online store is open 24 hours a day seven days a week and can be accessed on any online device.

Jonathan Tyson said: "We know when fishermen come in from a hard trip at sea that their day does not stop there, they need to plan and prepare their crew for the next trip. Now, with one click of a button on their online device in the early or late hours on board their vessel or from the comfort of their home, their order for ropes, wires, gloves, boots, clothing etc will be processed on our website and be delivered for when they

require, leaving them time to spend time with loved ones and have a rest before their next hard trip at sea."

Meanwhile, at Skipper Expo Int. Galway 2019, there will be special offers on the Tyson's stand for their GOLD STRAND Trawl Wire. Customer ZeikTuits describes it as "excellent quality wire and Tyson's service is always 100%!"

There will be offers on their King Crab range of ropes, 17mm Leaded which is used by customers Christopher and Anthony Harley, who say: "Tyson's King Crab Leaded ropes are excellent quality. Their motto is 'Trust Tyson's' and we have to agree."

Tyson's will also have their Tyson's Euros polysteel, Shamrock, multicolour and all their other ranges of potting ropes, plus much more at the show, with the team looking forward to meeting as many people as possible at Galway.

Visit Tyson's on Stand 8 at

the Galway show to see their range of chandlery, clothing, boots, gloves, as well all their online packages.

'Trust Tyson's' for quality products and service.

Exocet and V3 trawl doors from Morgère ideally suited for Irish fisheries

STAND
88

Skipper Expo Int. Galway exhibitor, Morgère, has strong historical links with Ireland and their trawl doors have been widely used by Irish fishermen for many years.

At Galway, Morgère will be promoting the Exocet trawl door and the V3 trawl door, both of which are ideally

suited for Irish demersal fisheries due to their excellent performance in challenging offshore conditions. Exocet is now used with great success by fishing vessels in several parts of the world, with fishermen attracted by the robustness and stability offered by the door, combined with the reduced drag that

benefits fuel consumption. A key feature is the lower angle of attack compared with a standard door while maintaining the same spread. The V3 trawl door is widely used by Irish fishermen because of its strong reinforced construction that has been specially

designed for use over rough seabeds, with its oval shape well suited for fishing over rocks and other challenging environments.

"The Irish market has always been tremendously important to us and we were keen to reinforce our strong links with Ireland by attending

Skipper Expo Int. Galway 2019," says Michel Dagorn of Morgère. "Both Exocet and the V3 are well suited for the fishing conditions found off Ireland and the UK," he says.

More information at www.morgere.com

Wide range of whitefish and prawn nets from Jackson Trawls

Galway exhibitor Jackson Trawls has been supplying a broad range of whitefish and prawn nets to Ireland for many years and have built up a good reputation for gear that works and is of good quality.

They supply all over Ireland from Cloggerhead in the east, to Castletownbere, Baltimore, Union Hall, Killybegs, Rossaveal and Greencastle.

Regarding whitefish gear, Jackson Trawls are selling single boat hopper trawls from 60ft up to 140ft with hopper sizes ranging from 14" – 21" used for catching round fish such as haddock and whiting, and also ground fish like monkfish, megrim and cod.

They have also been supplying lately, and will be promoting at the Galway expo, nets for catching cuttlefish and squid, both single boat and twin nets. Some of their Irish customers have been down in the Channel for the cuttlefish and up at Rockall fishing for squid.

In addition, the company has also supplied a number of seine nets, both clean grassrope nets and hopper nets, designed to give good height while maintaining good ground contact which enables them to fish well.

For prawn gear – Jackson Trawls will be promoting their wider bosom double bag trawls which are performing very well on the Porcupine Grounds. Their double bag nets have proved popular over the years for their fishing

effectiveness and durability, and the company has slightly changed the design to give more fishing area.

Single bag prawn nets continue to be popular, ranging in length from 10ft – 40ft, and mostly rigged on 8" & 6" discs.

For more information contact Jackson Trawls today at: www.jacksontrawls.co.uk

Upgrade to popular bronze pump range

The widely used “Cleghorn” bronze centrifugal pumps have had an internal re-design, which will interest visitors to Skipper Expo Int. Galway 2019.

The target feature was to radically reduce self-priming time, says Cleghorn. This has been achieved and first became available when incorporated into the 2” AM50 3-phase motor pumps, in mid 2018.

With a remarkable reduction in priming time of approximately 50%, the benefit will be particularly effective in larger vessels where significant pipe runs occur and where there are isolating valves and manifolds.

The new feature is also

appearing in the pedestal versions of the AM50D, for main engine driven applications. Design is now completed and testing in progress for the smaller (1 ½” AM40D) models which will be following the AM50 series into production.

The new models have identical external dimensions and are therefore fully interchangeable with all AM40/50 series which have been sold into the UK and Irish fishing industry since 1986.

Complementing the new units will be the well-established “PC” models, mostly applied to gearbox and hydraulic system cooling

duties, plus “TS” models designed for engine cooling on propulsion motors of up to 850HP.

Wide range of products & services from Mooney Boats

At Skipper Expo Int. Galway 2019, Mooney Boats Ltd will be exhibiting a wide range of goods and services. From new boats being built at their base in Ireland to the latest in industrial marine technology, Mooney Boats Ltd offers the ‘Complete Marine Solution’.

As part of their exhibit, Mooney Boats Ltd will be showcasing three of their most recent boat builds, the MFV Fiona K III, MFV Amethyst and the MFV Ocean Challenge. For boat repairs and maintenance, it has also been a significant year where Mooney Boats has experienced growth with

STAND

14

many new customers visiting the yard for the first time.

At the expo, Mooney Boats Ltd will also be exhibiting state of the art Ultrasonic Antifouling from Sonihull, in the form of the Soni8

and Sonihull Duo, as well as commercial fishing oilskins and the New Deck Boss Safety Boot from Grundens. **Mooney Boats Ltd looks forward to welcoming you at Stand number 14.**

Union Chandlery Displays New Bow Thruster

Union Chandlery, the Cork based marine equipment and product supplier, will be displaying revolutionary new Vetus BOW PRO thrusters at Skipper Expo Int. Galway 2019.

Vetus BOW PRO thrusters use proven induction motors without carbon brushes. As a result, the bow/stern thruster motor is maintenance free and has endurance rated run time* (*run time is governed by battery capacity).

Vetus has built in an over-temp controller and low battery protection, and combined with the brushless induction motor, make the BOW PRO SERIES highly

resistant to abuse and ideal for the most demanding boater, charter vessel or the most difficult manoeuvring situations. The proportional panels, along with a lock and hold-to-dock function for easy docking, utilise the same propellers and gearboxes proven in Vetus thrusters for over 30 years.

Benefits include proportional control in which exactly the desired amount of thrust can be applied, which is huge improvement on the normal crude on/off thrusters controls.

As long as there is sufficient 12v or 24v power available there is almost no limit to how long this brushless motor can

run. This has enabled Vetus to add a lock option to allow the thruster to be used to hold the boat alongside while lines are secured.

Roger Betts of Union Chandlery, says: “The main advantage is the proportional control, in that you control how much power you need at the touch of your fingertips as opposed to the old way of zero to 100% thrust in short uncontrolled bursts. This can give you a gentle throttle like, (more push more power) “controlled” thrust and manoeuvring. And due to the induction motor they don’t overheat in a matter of minutes like the old DC motors.”

The propulsion and driveline experts come to Galway

With over 40 years of marine driveline experience, MIT is, in 2019 committed to better serving the Irish marine market and its customers by exhibiting at Skipper Expo Int. Galway, 8-9 March 2019.

Identified as a central hub to the UK and Irish fishing industry, MIT now has a dedicated presence in both Northern and Southern Ireland. Over the past year, the business has been intensively studying the needs of this geographic region, and offers not only servicing, breakdown and spare parts but is also able to act as the expert consultative service to all aspects of the supply chain.

MIT has the expertise to work with not only end users but also with both boat builders, naval architects and engine OEM's to advise on an extensive range of best fit marine components; ranging from gears and controls to anti-vibration engine and exhaust mounting.

Offering both new and reconditioned marine gears, clutches, PTO's and hydraulic pump drives, MIT also understands the need to keep vessels at sea, and the impact downtime has on profitability.

Keeping all configurations of driveline operational

With over 40 years of industry experience, MIT offers full life vessel support, ensuring that your business downtime is kept

to a minimum. MIT pride themselves on their customer driven philosophy. The customers' business truly is at the heart of everything they do. They have a highly skilled and dedicated technical engineering team offering everything from bespoke supply and design through to installation, servicing and repair.

An essential aspect of value delivered by MIT is their team of qualified service engineers, offering extensive service, preventative maintenance and overhaul capabilities on most models of marine drivelines, along with being the UK/Ireland distributors for Twin Disc, and official service partners of ZF Marine, Reintjes and Servogear.

Based out of their Kent and Yorkshire service centres, their mobile engineers are equipped with tooling and spare parts to visit your vessel no matter the location. All repairs, maintenance and overhaul work, are carried out using genuine OEM parts to ensure quality and extend the life-cycle of your application. More than just marine transmissions, MIT support critical components both below and above the waterline, with offerings from some of the industry's leading brands such as Twin Disc, Transfluid, Rubber Design and Quincy Compressors.

Their comprehensive product portfolio offers not only standard marine gears

STAND
80

MIT twindisc-5061a

but hybrid/electric driveline technology, anti-vibration mounting technology, exhaust suspension systems, power take-offs and air compressors. The below deck component offering also extends to propeller solutions, surface drives, trim tabs, shaftline systems and bow and stern thrusters.

Above deck technology also features strongly in the MIT portfolio, designed to aid a users' dynamic positioning – retaining their vessels station in challenging at sea environments. Joystick controls, hydraulic and electric steering systems and electronic controls allow excellent vessel movability while seamlessly integrating into existing driveline arrangements.

MIT says it is delighted to be exhibiting at Skipper Expo Int. Galway where on stand 80 they will be discussing how MIT is your complete driveline solution provider and introducing the dedicated Irish Sales Engineer.

Safety at Sea with Mullion Survival Technology and URSUIT Diving and Drysuits

STAND
20

The Commercial Fishing Industry has improved their safety record as more and more fishermen accept the need for on deck use and wear of PFDs.

Galway exhibitor Mullion Survival Technology continues to play a major role in improving the style and ergonomic design of life jackets to provide even more wearer comfort and performance.

The design features of the new Mullion Compact Supreme is the result of extensive communication between Mullion Manufacturing, RNLI Commercial Fishing Training Management and the Commercial fishermen in Ireland and UK.

This new design PFD is available through A BIM PFD Replacement Scheme under the Enhanced Safety Scheme Initiative launched four years ago. All registered Irish Skippers and Crew qualify for the replacement with the PLB reinstalled in the new issue life jacket.

The support schemes in place for training and safety awareness ensures a continuing uptake by fishermen in learning how to stay safe on the job and having their personal PFD.

Personal Locator Beacon – PLB & ComReg

Further to the uptake and use of personal floatation devices the added importance of also having a personal locator beacon, as part of the safety

equipment, ensures that if in a crisis situation an alert to the Rescue Services is now very much in the hands of the individual fisherman.

Whether purchased through the BIM Enhanced Safety Scheme, or as an individual investment in safety, it is essential to ensure the unit is registered online through ComReg.

ComReg is the statutory body responsible for the regulation of the electronic communications sector (telecommunications, radio communications and broadcasting transmission). By registering personal and individual details of contact details, the Rescue Services can react instantly with the full knowledge of the information immediately available.

PFD Servicing

It is a very important requirement under the Enhanced Safety Scheme Legislation that the PFD/PLB unit be serviced by an authorized Service Centre every

year.

On the Mullion 150N Compact, issued through the BIM Enhanced Safety Scheme, there is a service Record Card on the reverse side of the cover indicating the month and year when service is due. On the first service a pre alert text message will be transmitted to the personal contact of the registered owner.

The mechanism is also visible through the cover showing two green indicators as fit for purpose. If either one is showing red it is not fit for purpose and must be checked before use as either the gas canister or mechanism are loose or already used.

At Skipper Expo Int. Galway 2019 URSUIT a companion company of Mullion within the Sioen Group will demonstrate the Range of professional dry suit styles which will be on display.

A Lifejacket Useless Unless Worn. For more info contact: tony.brown@sioen.com. Tel: +353 749531169.

Wide range of fishing equipment from AS SCAN

Galway exhibitor AS SCAN is a modern and high-tech engineering company with 45 highly qualified employees working inside the fishing business since 1967.

AS SCAN designs, produce, install and service all type of hydraulic and electrical winches for the fishing industry. The company has extensive experience in steel structures, engine and hydraulic installations.

AS SCAN has own CNC machines with CAD / CAM systems and all products are produced directly from 3D drawings. The company evolved from being a local fishing gear provider to become also an export-oriented company with several products for various industries and markets worldwide.

Their newest development is their unique Trawl Computer which makes life easier on board the fishing

STAND
29

vessel, such as Trawlers and Flyshooters. They have installed more than 25 systems since beginning 2016.

Full equipment range from Cavanagh Nets

Cavanagh Nets will have on display at Galway a full range of their various types of pots in frame and completed form for the inshore potting industry, along with a range of netting, Polyform Buoys – all sizes & colours, a wide range of Powerflex potting ropes in unleaded and leaded.

Their staff will be on

hand to meet existing and new customers to discuss their needs and requirements for the season. On display will be a range of rigged trammel, bait, plaice, turbot, monk, skate and soles nets, as well as a large selection of monofilament gill nets. These nets can be rigged to suit customers' requirements. A re-rigging service is also

available.

They will also have on display a selection of knives, gloves, clothing and general chandlery for the commercial marine & potting industry. Cavanagh Nets is also an approved Mullion PFD/ lifejacket service station. **Visit Cavanagh Nets Stand 38 and see the many special offers they will have available.**

STAND

Busy time for BOPP

Galway exhibitor BOPP is busy with a number of projects, including the supply of a complete package of fishing equipment for skippers David Gatt and Barry Reid for their trawler, Audacious.

The package supplied includes the winches linked with an auto-trawl system,

netdrums, gilson, steering gear, bow thruster, oil tank, hydraulic components (pumps, manifolds, valves) and control desks.

Sea trials were completed in November 2018 with service engineers from BOPP and JC Hydraulics onboard.

Meanwhile, one of the

major shipowners in France, Armement Porcher, opted for BOPP for the complete fishing package for their next two new 25m trawlers that will be built by Socrenam shipyard in Boulogne sur Mer. The most recent one Diogene has been at sea since last year.

Chartistic – Art from Charts. Nautical charts that is!

Chartistic's mission is to capture your favourite piece of coastline and transform it into a stunning and unique work of art just for you.

The sea and coastline evoke special memories and emotions especially in those who make their living from it or use it for pleasure. Chartistic captures those memories and emotions by faithfully recreating the nautical chart of the area and presenting what lies above and beneath the waves in an innovative 3D form on wood. Any chart from any coast, anywhere, can be created just for you.

As the Chartistic 3D Chart is made just for you, it can be customised to suit your exact size and requirements and can be inscribed with words or other important features such as your house, your boat, or

almost anything else! Each chart is therefore unique to you making it a very special thing to have.

Charts are created with laser precision to faithfully reproduce the original paper chart with incredible detail. The final piece is then assembled by hand and professionally framed to produce a truly unique and stunning personalised piece of art that you just won't find anywhere else. The 3D effect in wood adds depth and structure to emphasise the nature of your special bit of coast and what lies beneath. Major depth contours are painted so that the final chart is presented in beautiful colours similar to the paper chart.

So, if you love the sea or know someone who loves the sea, and you want to treat them to something special

STAND

GlobeWeigh Take Care of Catch Compliance from the Net to the Plate!

STAND
55

Weighing, labelling and inspection specialists, GlobeWeigh Group will exhibit their wares again at this year's Skipper Expo Int. Galway. Operating throughout Ireland from offices in Cork city and Portadown, Co. Armagh, GlobeWeigh are experts at identifying strategies to maximise production efficiency and manage compliance, having worked with many of Ireland's leading fish Co-Ops and fish processors.

Their expertise covers a catch's journey from sea, to shore, to the supermarket. Onboard weighing, using a range of specialist marine scales, allows products to be weighed and labelled accurately in even the roughest of seas. This uniquely addresses the requirements of the frozen at sea prawn industry, as well as the white fish industry, providing complete traceability and compliance with regulations. GlobeWeigh's wheelhouse systems also provide a viable labelling and traceability solution for frozen at sea prawns, facilitating the labelling of inner and outer boxes, and in a range of European languages, when required.

This year Globeweigh will

demonstrate their solutions to manage the intake of fish from boats, into the factory, whilst maintaining full source and traceability details, which is essential to meet SPPA regulations.

Their on-shore solutions include full traceability systems, which trace the catch back to the boat, area and time of the catch, and their factory systems facilitate all aspects of factory floor management including intake, stock, yields, labelling, and dispatch.

GlobeWeigh's engineers source and install high specification equipment due to exclusive partnerships with some of Europe's leading suppliers. Many of the following products from their range will be on display:

- CRAFT System (Catch, Report & Fish Traceability)
- E-locate Technology

and Traceability Systems

- On-shore Boxing Stations
- Onshore Intake, Process, Dispatch and Traceability Systems
- Marine Scales
- Onshore Scales

The team pride themselves in delivering exceptional customer service. Their maintenance engineers are on call 24 hours a day, 365 days a year to service machines regularly and review stock levels of consumables. This ensures that production downtime is kept to a minimum.

Visit GlobeWeigh Group on Stand 55 and the team will talk you through, and demonstrate their range of weighing, labelling and traceability products for the fish industry.

Mactex Oil Distribution announce new authorised distributor agreement

STAND
85

Galways exhibitor Mactex Oil Distribution Ltd has announced an agreement to become a Fuchs Lubricants Authorised Distributor.

After eight years successfully promoting the Fuchs range, Mactex Oil have been appointed official Fuchs Industrial Lubricants and Metalworking Fluids Distributor. Fuchs lead the field in industrial lubrication and are world leaders in several markets with their various brands.

One such brand range is Fuchs Cassida, these food grade lubricants are recognised as the world leaders when it comes to protecting machinery where incidental lubricant contact with food may occur. The full Fuchs Cassida range is now available from Mactex Oil. Fuchs Lubricants PLC is the largest independent lubricants producer in the world and blend over 10,000 unique product formulations.

Liam Grealy the MD of Mactex Oil said he was delighted that Fuchs had recognised the hard work they had put in developing the Fuchs Oil brand in Ireland.

"We look forward to

growing our business with the help of Fuchs and welcome the opportunity to promote their new range of Ecocool Metal working fluids," he said.

The Ecocool Range exceed all Global H&S Legislation and CLP labelling requirements, these newly formulated products are all FAD-Free and lead to a safer working environment within plants where used.

From their state-of-the-art warehouse in Oranmore, Co. Galway, Mactex Oil Distribution Ltd can offer a next day delivery service nationwide. For quick and easy access to all their products 24hrs a day, buyers can log on and purchase through their online shop www.mactexoil.ie

Alongside the Fuchs Oils products Mactex Oil also owns the Ecolubrium Oils brand. Under the Ecolubrium brand they supply a core range of Automotive, Commercial and Agricultural lubricants. The Ecolubrium Oils can be sourced directly from Mactex Oil or from one of their many resellers. Ecolubrium Turbo-Syn 15w/40 LD has become the oil of choice of most

Agri-Contractors and farmers, this long-life, high performance engine oil is the class leader when it comes to quality and value. Their Newdraulic HVI high viscosity index hydraulic oils outperform all similar oils in the market and again offer outstanding quality and value.

For best quality, best service and best price look no further than Mactex Oil

Michigan Marine Propulsion at Galway

STAND
69

Galway exhibitor Michigan Marine Propulsion continue to provide a wide range of high quality propulsion products and packages, many of which are specifically tailored for the fisheries industry.

To complement their Michigan propellers, they also build and supply complete stern gear systems, underwater hardware, rudder assemblies and a variety of replacement spares and after-market propulsion products. Within this range, they stock their Aqualube water lubricated bearings, MMP serrated rope cutters, and the Ercem series of shaft face seals.

Their Repair Centre facilitates propeller refurbishment and tuning services; providing very high accuracy repair

and modification to customers. The workshop is fully equipped with a custom designed, custom manufactured, hydraulic pitch adjustment machine and two separate MRI computerised propeller measurement machines.

All their products and services are bolstered by out-standing engineering, technical, and design capabilities.

This is something they claim that really sets them apart from the competition, and is supported by their 110 years history of continuous trading, experience and expertise. Over the years they have successfully worked with many of the world's leading shipyards and military agencies, and been involved with many high profile recreational

applications.

Come and visit Michigan Marine Propulsion on stand 69 at Skipper Expo Int. Galway, where their Sales team and Marine Engineers will be available to show you their services, product range, and discuss your requirements.

Engine Solutions
THE FUEL CLEANING, DIAGNOSTICS & SERVICING SPECIALISTS

Comprehensive range of services from Engine Solutions Ltd

Galway exhibitor Engine Solutions Ltd is the sole distributor for YC Europe Marine, industrial engines for Ireland and larger engines for the UK. The range is from 100 hp to 1700hp straight 8 cylinder engines. YC Europe also features a 6 cylinder 1000 hp engine.

They also have YC gensets for marine and

industrial purposes from 3 kva up to 3000 kva.

Engine Solutions is also solo distributor for Aderco organic fuel treatments.

Andrew Deacy of Engine Solutions says: "Meet us at the Galway skipper show where we can help with the 2020 sulphur cap regulations and ensure clean tanks and reduced smoke emissions."

There will also be

Upgraded coatings removal service from Davidsons

Galway exhibitor Davidsons Marine & Industrial Painters (Davidsons) have always been at the forefront of introducing and maintaining best practice in the marine coatings sector.

Davidsons are the only marine coating company in Scotland to own one of the industry's highly efficient, cost effective, safest coating removal tools on the market. Expert in their field and with over 40 years' experience in the marine coatings industry, Davidsons have brought to the fishing fleet an upgraded coatings removal service with the purchase of the Falch "Multi-Worker".

The Falch "Multi-Worker" is an innovative coating removal tool which is 200% - 400% more efficient than more traditional methods

for coating removal. The Falch "Multi-Worker" allows increased productivity, significant reduction in vessel down time with the added benefit of greatly reducing the health and safety risk associated with the older more traditional methods of coating removal practice.

Davidsons has already completed number of projects local to their area in the North East of Scotland with outstanding results. The enhanced coating removal service using the Falch

"Multi-Worker" tool is a first of its kind to be delivered to the North East fishing ports and will further enhance the maintenance services on offer from Davidsons to the fishing sector.

Robust plastic fish boxes & containers from Craemer

STAND
60

Craemer UK has supplied the fishing industry from its production factories in Telford England and Herzebrock in Germany for over 35 years.

Still a long standing family company, Craemer has now introduced a new, heavy duty pallet box for use in a variety of fishing industry applications. The CB3 is an extremely durable, robust container, used for fish, ice, nets, or waste transport, and anything else which the high demanding fishing business may require this 610 Litre big box to do. It is 1200 x 1000 mm standard pallet size, which is great for transport, and has extra-large entry gaps in the pallet base, for easier

handling with all types of pump trucks, fork trucks and pallet movers.

As well as making standard fish boxes, Craemer is acknowledged nationally and internationally for making some of the most reliable plastic pallets in the marketplace. You would therefore expect the CB3 pallet box base to be stronger with higher impact resistance than an ordinary pallet box. And it is. Clean lined and stackable for transport, the CB3 also has a baby brother, the 1200 x 800 mm Euro size CB1 pallet box as another option within this special range of products available from Craemer UK Ltd. Stand 60 Skipper Expo Int. Galway.

Cavanagh Hooper Dolan Insurances Ltd

STAND
65

Skipper Expo Int. Galway 2019 show sponsor, Cavanagh Hooper Dolan Insurances Ltd is your 'one stop shop' for all your insurance needs afloat or ashore.

With over 75 years' experience in the insurance industry the Cavanagh family and their staff have established individually tailored insurance packages to cater for their clients' needs and provide a 24/7/365 claims service to their marine customers.

As part of their marine product range they can cover everything from the smallest inshore vessel to the large pelagic vessels. Policies cover a wide range of marine risks such as:

- Hull and Machinery
- Protection and Indemnity (P&I)
- Crew cover
- Personal Accident
- Cargo
- War risks

Cavanagh Hooper Dolan Insurances Ltd can also provide cover for commercial insurance requirements onshore, these include:

- Onshore storage units and property
- Employers Liability

- Public Liability
- Offices
- Forklifts
- Motor Fleets, etc.

They also work closely with the marine trades and provide service to businesses that supply to the marine industry. This includes, but is not limited to, areas of work and trades listed below:

- Fisherman's Cooperatives
- Fish processors
- Engineering
- Painters
- Welders
- Electricians
- Engine Suppliers
- Propeller maintenance
- Hydraulics
- Boat builders & boat repair yards
- Chandlery

They provide a range of insurance products for other areas in the marine environments such as pleasure craft, passenger vessels, ferries, workboats,

chartered angling, rowing clubs and marinas.

Cavanagh Hooper Dolan Insurances Ltd look after the needs of owners and crews with a competitive range of personal products. They know how busy their clients are so they can help take the stress, time and work out of shopping the market for personal products like Car, Van, House, Health, farm and travel insurance, etc. Their professionally trained staff can explain the differences in features and benefits in the products offered.

For product information and free quotations, visit Cavanagh Hooper Dolan's website at www.chd.ie, email the team on info@chd.ie or call them today on 074 91 77500.

SeapiX 3D Sonar: iXblue and SIRM announce the future of Irish Fishing

STAND
71

SIRM UK Marine Limited have expanded their product portfolio by entering into a partnership with iXblue, manufacturers of the ground breaking SeapiX 3D Multibeam Sonar System. This exciting partnership allows SIRM to distribute SeapiX in both Northern Ireland and the Republic of Ireland.

SeapiX offers sustainable fishing for both Pelagic and Bottom Trawlers and revolutionises fishing techniques by giving vessel owners total control over the underwater environment.

With the requirement to target only specific species due to quota controls, discard rules and protected species, SeapiX allows

the skipper to build their own species categories. Shoals are identified and displayed in real-time in both 2D and 3D mapping, providing information on shoal abundance estimation and depth and species composition all within the area they are towing in. Users can estimate the percentage of a particular species and can, for example, identify if it is herring or mackerel, cod or hake, prawns, or single fish such as tuna then choose to display only the targeted species in 3D, and adjust their trawl accordingly.

With a range from 5m to 450m, SeapiX offers 200 times more coverage than a traditional Sonar, with 50 times more resolution, thanks to its

individual 1.6deg beam resolution and Chirp processing. Bottom trawlers operating at around 150m to 330m can utilise 'bottom' mode to provide fish classification of the trawling layer only, allowing them to decide when to tow, saving on fuel costs and possible gear damage.

SIRM UK Marine Limited will be displaying the SeapiX Sonar at Skipper Expo Int. Galway on stand 71. Yvonne James of SIRM UK Marine Limited is delighted to be bringing SeapiX to Galway for the first time. "Having seen SeapiX in action I am confident this exciting and innovative product brings fishing technology to a new level."

New smaller trawl doors offer bigger spread and reduced fuel

STAND
05

Trawl door manufacturer, and Galway exhibitor, Thyborøn Trawldoor is introducing its new Type 23 Bluestream doors, with fishing trials having shown their effectiveness.

The doors have been developed using the company's experience and features the dimensions of its Type 14 doors and the effectiveness of the company's Type 22 doors, combined with implemented Bluestream special technology, in which the waterflow is forced to its maximum through the foils of the door, thereby creating a more powerful spread force and less drag resistance on the doors.

The feedback from trials of the new Type 23 Bluestream doors from several vessels yielded extremely positive results, the company said.

"These powerful doors are giving much greater spread without any reduction in catch rates, whilst retaining normal, or even reduced, fuel consumption," said Tonni Karlsen, skipper of the 54.6 meter twin rig trawler Ole-Arvid Nergard.

The vessel fishes in the Barents Sea, Svalbard area and off the Norwegian coast fishing for cod, saithe, haddock, redfish and shrimp.

With its 17-man crew working trips ranging from two to five weeks,

the 2001-built Ole-Arvid Nergard, has a frozen hold capacity of 420 tons, making it important that catch volumes remain constant so the vessel can maximize its catch during its fishing trips.

"It is therefore important that when we considered changing our trawl door supplier that we didn't sacrifice any catch-per-tow volume, even if the spread was improved," said Karlsen.

"But we certainly have no concerns now with these new Type 23 Bluestream doors, as they have increased the spread of our gear by an amazing 50 meters and without losing any catching capacity in the process," he said, adding that with the new doors, the vessel's fuel consumption has not increased and is even slightly less than with their previous doors.

"What is fantastic about these doors is the fact that they 'spray' (spread) from the moment you start shooting away the gear, so when the trawl hits bottom you can see that you already have the maximum spread that you need -- and they are so incredibly stable that they maintain this spread through the duration of the tow without any problems," Karlsen said.

Ole Kjaergaard, who has been with the Thyborøn

Trawldoor company for over 25 years, said the company's doors are an advantage for fishermen facing higher fuel costs.

"If we switch our own well-known Type 14s 10m2 with a Type 23 Bluestream 9m2 there is up to 50 percent less resistance on the doors when pulled through the water without any bottom friction or contact, meanwhile they produce the same powerful spread on the nets," he said.

The Type 23 doors are constructed using the same steel plates that are made for shipbuilding and require less maintenance.

Prolines Naval Architects - designing innovative new vessels

STAND
44A

Prolines Naval Architects are Ireland's only independent chartered Naval Architects, with nearly two decades of trading in both the commercial and non-commercial sectors of the marine industry.

Having upgraded their software offering with the purchase of Cadmatic in 2017, Prolines have been involved in the design of new and innovative vessels in the Irish, European and worldwide markets.

Cadmatic is the industry standard design tool for detailing all steel and aluminium vessels. As a result, they have increased their productivity and have been able to offer new services in detailed design and CNC kit production.

Prolines is an independent company and so is not tied to any one boatyard or supplier, allowing the client to get the best deal possible. "It is important that we try and keep the projects in Ireland," explains naval architect Rob McConnell, "it will greatly improve production time for the client, keep costs down and prove that Ireland is up there with the best countries in the industry."

Prolines is known and

trusted within the industry, and they feel that they can compete on both price and true knowledge of the industry, which will save their clients both time and money. There are very few companies in Ireland capable of offering the design of a new vessel and Prolines is the only company with the combination of skills, experience and a full time naval architect.

Prolines has been an annual exhibitor in attendance at Skipper Expo Int. Galway, and they say that their presence at the show is invaluable to their business. The Expo gives the company the opportunity to network with new and existing customers. It gives customers the chance to ask questions and review

projects they have been thinking about.

Prolines' partnerships with Ireland's largest boat building manufacturers can ensure that projects will be reliably overseen from the initial design stage, right through to finished vessel flagging compliance. The high quality engineering software allows for a higher degree of prefabrication and pre-outfitting of blocks, thereby reducing building time and in turn, reducing costs for the client.

"Vessel structures can be modelled easily, and the accuracy of the drawings are second to none" said naval architect Brian McConnell. "We are thrilled to be the first in Ireland with this software."

Exclusive 20% parts discount available from Finning

STAND
03

Finning UK & Ireland (Finning) will be offering an exclusive 20 per cent discount* on genuine Cat parts at this year's Skipper Expo Int. Galway show, while also demonstrating its servicing and parts capabilities.

Taking place 8 – 9 March 2019 at the Galway Bay Hotel, Finning will be on stand 3, encouraging owners and operators to take advantage of an exclusive 20 per cent discount on all Cat marine parts and components purchased during the show and up until 22 March. This discount will cover all engine components, as well as filters, oils, coolants, batteries and other essential maintenance parts.

This offer will allow owners and operators to take advantage of the reliability and durability of Cat genuine parts, ensuring their engines continue to deliver optimum performance whilst maintaining efficiency, resulting in lower total cost of ownership. Furthermore, by using the correct component – and not a third-party spare part – designed and built by the manufacturer to the correct specification with performance guarantees, purchasers can help ensure their engine's longevity.

Paul Hoban, Regional Sales Representative – Marine at Finning, adds: "Engines are

one of the most important expenses for your vessel, and ensuring a high-performing solution at the best possible price is a key concern for owners and operators.

Informed by decades of diesel engine innovation and expertise, the Finning marine team will be on hand to offer the best solutions for your vessel.

"We will also be offering all attendees a 20 per cent discount on all Cat parts ordered during the event, with a comprehensive 12-month manufacturer's warranty that will reduce owning and operating costs in both the short and long term.

"As Ireland's flagship fisheries show, Skipper Expo Int. Galway exhibition represents an ideal opportunity to meet with Finning experts in person and discuss the range of solutions we have available in more detail. We look forward to welcoming visitors to stand 3."

Finning works with boat builders, owners and fleet superintendents, offering

a range of Cat and MaK marine propulsion solutions, auxiliary engines and packaged generator sets for the marine industry.

For more information about Finning, please visit www.finning.com.

*All sales are subject to Finning standard Conditions of Sale and Supply: the 20% discount offer is available only to customers who attend the Skipper Expo Int. Galway event on 8-9th March 2019. To benefit from the discount, customers must quote code 'SKIPPER20' when placing an order for Cat parts at the event or at their local Finning branch by the 22nd March 2019. Only one discount code can be redeemed per customer. This discount cannot be used in conjunction with any other offer, national agreement or pre-agreed discount. Standard delivery charges may apply. This promotion is subject to availability and Finning reserves the right to vary or withdraw it at any time without notice. This offer is not available for purchases made via www.parts.cat.com or Parts Direct.

GCM Painting at Galway

STAND
14

GCM Painting Ltd is a marine painting service company based in Killybegs and they will be exhibiting on the Mooney Boats stand at Galway (stand 14).

The bulk of their work is carried out in the Department of Marine synchrolift which dry docks boats up to 600 tonnes and has a shed facility to paint boats inside. GCM painting Ltd also provides services to both Mooney boats and the bigger vessels in the Killybegs fleet. They work closely with other

companies to ensure all projects are run smoothly,

thus providing a top class service.

Many exciting new developments at O'Sullivan's Marine

STAND
30C

While continuing with their boat building programme, Galway exhibitor O'Sullivan's

Marine has now expanded their product range massively. Having taken on the distribution of Whaly Boats on top of Linder Aluminium Boats last year, along with Suzuki outboards, they have now committed to stocking, distributing and selling several new brands throughout Ireland.

Starting with a full range of RIBs and Inflatables – all at fantastic prices and top quality – they now also distribute a full range of kayaks and SUP boards. As if this was not enough, they have also added extensive ranges of safety equipment and general chandlery from Lalizas, Nuova Rada, Ocean Fenders, Max Power bow thrusters and Lofrans windlasses, with a host of ancillary equipment.

Now boasting a product range of over 10,000 items, O'Sullivan's Marine are one of the best stocked marine businesses in the country.

Be sure to call to their stand for an overview of what they sell and look at the extra special show offers available over the weekend.

For example:

- OSM boats and RIBs – on display will be an OSM 575 2019 model.
- Whaly Boats – on display will be a Whaly 500R fully fitted out.
- Tohatsu Outboard Motors: with a 7 year conditional warranty for recreational users. Ask for Brexit prices!!
- Suzuki Outboard Motors: with a 5 year conditional warranty for recreational users. Special offers for commercial users.
- Honda Outboard Motors: with a 3 year conditional warranty for recreational users. As reliable as ever!
- Lalizas – see the comprehensive selection of safety products from

their catalogue – large range of products suitable for commercial use. Immersion suits, lifejackets, buoyancy aids, flares, liferings, nav lights (LED) to name but a few.

- Nuova Rada – see another great selection of general chandlery products, at simply excellent prices! Fuel tanks, hatches, engine fittings, plumbing, deck equipment, mooring and fishing equipment.
- Ocean Fenders – see the massive range from the biggest factory in Europe. Are these the most competitive prices in Ireland.

As O'Sullivan's Marine has a small stand at the show, they can only give you a tiny overview of what they carry in stock, so if there is anything you need for your boating, be sure to pay them a visit and see the best prices available, along with legendary service. They will make it worth your while.

Clever Agri Components

Clever Agri Components is an independent distributor with a variety of components to supply the agricultural & commercial fishing sector. They are an Irish owned family run business that is committed to providing a high-quality product with an excellent service to their customers. With over 50 years' experience in the agricultural sector Clever Agri recognises the importance of a quality product with a reputable after sales service.

Their wide range of lighting has established itself as a dependable durable product, which has gained recognition in the commercial fishing sector. The technology used in their lighting range is

a Multiled Pro technology for better heat regulation. The quantity of aluminium in the body of their lights also provides favourable heat regulation and therefore improves the life span of their lighting range.

- Some of the attributes of their lighting range:
- excellent heat dissipation due to a solid heat sink
- optimal light distribution via individually adjustable modules
- high-quality materials for use in tough environments
- very high ammonia-resistant
- IP rating from 65 to

69 (IP 66 protected against water jets and sea water and dust-proof)

- suitable for outdoor use
- with D marking according to DIN EN 60598-2-24, therefore suitable for areas at risk of fires due to combustible dusts or fibres (hay storage, feed, litter, etc.)
- direct or hanging ceiling installation with adjustable mounting brackets or eyelets

The confidence they have in their electrical products allows them to provide a 2-year guarantee for the majority of these products!

STAND
90

STAND 72 Proteum announces OXE Diesel 125 and 175 now available at Skipper Expo Int Galway 2019

Proteum, UK & Ireland distributor for OXE Diesel, is announcing at Skipper Expo Int. Galway 2019 that the new OXE 125 and 175 additions to the OXE Diesel product portfolio are now available in stock for fishing and commercial marine customers. The extended portfolio, launched in November by manufacturer, Cimco Marine, offers 125HP, 150HP, 175HP and 200HP options to meet a range of user specifications.

Proteum will be exhibiting the OXE Diesel, the world's first high power diesel outboard, at the show. With

over 200 units in service with high intensity users, OXE has proven its reliability and cost effectiveness in a

wide range of applications. "Our in service data shows OXE's higher acquisition cost is recoverable after only 1500 hours or 12 months operation when compared to an equivalent petrol outboard", says Neil Taylor, Head of Sales at Proteum.

The OXE Diesel is a cost effective alternative to petrol in total cost of ownership, benefitting from lower fuel costs, higher working efficiency, lower maintenance and ease of sourcing compared to petrol. OXE 150

uses up to 40% less fuel than a modern 150HP 4-Stroke outboard giving it an extended range, significantly increasing operational time between refuelling. Diesel's lower volatility also makes it a safer option than a petrol.

Sola-Cure wheelhouse blinds from Mooney Boats

Mooney Boats has been the exclusive representative for Sola-Cure in Ireland for more than 8 years. Having recently delivered the 27m trawler Fiona K III to Tom Kennedy Fishing, Sola-Cure were delighted to receive these wonderful images of the anti-glare blinds installed in the wheelhouse.

The images clearly demonstrate the difference between windows with and without anti-glare blinds. During the winter months, heat in the wheelhouse is not a big problem but the low sun does affect the skipper's visibility. This makes for a safer working environment and protects the eyes against long term damage due to exposure to harmful UV rays.

As can also be seen from the images, Sola-Cure are familiar with the typically peculiar shape of wheelhouse windows. The blind material is carefully cut to suit the shape of the window and are available with wire guides. Wire guides are a useful option which stabilise the blinds in rough

seas and prevent unnecessary movement and noise.

Skippers based in Ireland that are interested in getting a price for blinds on board their vessel need only provide Mooney Boats with a width and a depth of their windows. A quote can be provided from this basic information. The price is fixed regardless of the shape and any angles that require cutting of the film to suit.

Staff at Mooney Boats are currently preparing for the Skipper Expo show in Galway and will be available on the stand to discuss Sola-Cure anti-glare blinds. General Manager of Sola-Cure, Peter Jones offered his thoughts on the increasing appreciation of having blinds installed: "Through Mooney Boats in Ireland and our own efforts in Aberdeen, we have received some really impressive feedback from Skippers with our blinds on-board. Thankfully, the fishing industry is a tight knit community, so we can provide potential customers with the names of our existing clients and repeat

what we hear from them. The sun causes a real problem, either directly or when it reflects off the water. In the summer, they also help maintain a comfortable temperature in the wheelhouse, reducing air conditioning demands in the process. Sadly, there are few products that offer such obvious benefits that don't cost a lot of money. It's a rare thing these days."

STAND
14

EXHIBITOR PROFILES

AIB STAND 18

Recognised as one of the primary lenders to the fishing sector, AIB has over 200 outlets nationwide including all of the major fishing ports where a full range of services are available. At AIB we recognise that the fishing industry is a vital contributor to the economies of our coastal towns and rural communities. AIB will exhibit on Stand 18, where staff from fishing branches around the coast will be delighted to talk to you about your business.

For more information on all the ways that AIB can support your business, visit our website at www.business.aib.ie

BARRY ELECTRONICS STAND 16

2018 was a very busy year for Barry Electronics with 2 new builds in Karstensens Shipyard with the Girl Stephanie and Western Chieftain. Along with that we had a number of vessels getting substantial refits done in Killybegs.

Barry Electronics Ltd have established themselves as the biggest supplier of VSAT in Ireland. The reason for this is we have well trained qualified staff to support and maintain the systems we have in our fleet. We have systems tailored to suit the needs of smaller vessel and will provide reliable and cost effective Internet connectivity at sea. The vessels crew have access to on-board Wi-Fi, Electronic Log Book reports and cheaper telephone calls. The need for data is increasing every year and our systems are meeting these requirements. The new Fleet One Satellite system is also on many vessels and is the most cost-effective Log Book Communication system on the market today. This replacement system works out much cheaper compared to the Satlink Fleet Broadband currently used by Irish fishermen. Also on the stand will be the full range of Furuno equipment and introducing the new range of Furuno Chart Plotters. We will also have equipment from Furuno, Simrad, Max Sea, Olex, Cobham Sailor and Marport Trawl technology.

Contact Barry Electronics, T: 0749731215, Email: cjoyce@barryelectronics.ie, Web: www.barryelectronics.ie

BELCO MARINE ELECTRONICS STAND 36

Belco Marine Electronics Ltd supplies and services a full range of marine electronic equipment to the fishing industry on the south and west coast principally based on the JRC range of marine equipment. Sodena and Maxsea timezero are also important equipment supplied. Belco Marine provides installation and service of GMDSS equipment and service contracts, multizone bilge alarms, fire alarms, gas alarms.

Contact: Belco Marine Electronics Ltd, Unit 1, West Cork Storage, Baltimore Road, Skibbereen, Co. Cork. Tel: 00353 (0)28 36209, Mob: 00353 (0) 86 2607994, Email: jomahony@iol.ie, Web: www.belcomarine.com

BERE ISLAND BOATYARD STAND 12

Bere Island Boat Yard was established in 2005. It has recently been fully covered, and so is fully operational in all weather conditions. We can take vessels up to 44 metres in length, 15 metres wide & 6 metres draught. We offer the following services:

- Power Washing & cleaning
- Steel fabricating & welding
- Sand blasting & metalizing
- High-pressure water blasting
- Painting
- Paint (International & Chugoku) & anodes are available from stock
- Plastic welding
- Degafloor marine agents

**MARINE & INDUSTRIAL TRANSMISSIONS LTD
STAND 80**

With a dedicated presence in both Northern and Southern Ireland, MIT offers not only servicing, breakdown and spare parts but is also able to act as the expert consultative service to all aspects of the supply chain. With the expertise to work with end users, boat builders, naval architects and engine OEM's MIT

advise on an extensive range of best fit marine components. Offering both new and reconditioned marine gears, clutches, PTO's and hydraulic pump drives, MIT also understands the need to keep vessels at sea, and the impact downtime has on profitability.

Contact Marine & Industrial Transmissions: Queenborough Shipyard, Queenborough, Kent, ME11 5EE. Email: info@mitgroup.co.uk, Web: www.mitgroup.co.uk

**MARINE DESIGN INTERNATIONAL
STAND 11**

Independent Naval Architects providing design and consultancy, reliable dependable service to commercial clients where timely delivery and problem solving is essential to project success. Our Naval Architects will be on our stand to provide ideas for improving your vessel, advice on conversion or developing a new design. The show is an excellent opportunity for you to discuss ideas with experts at no cost so make the most of it and see if we can help.

Address: R12, 100 Borron Street. Phone: 00441418164000, Email: admin@marinedesign.co.uk, Web: www.marinedesign.co.uk

**MARINE INSTITUTE
STAND 24**

The Marine Institute is Ireland's national agency for marine research, development and innovation. Its work includes research and development funding; fisheries resource assessment and advice; fish health services; marine food safety; environmental monitoring, research vessel operation; seabed mapping and marine data management. In addition various EU Directives require Ireland to protect and conserve certain habitats and species in this area. Fisheries work within inshore waters includes; stock assessment of

shellfish, assessing the environmental impact of shellfisheries in conservation areas and developing fishery management plans with the industry.

Address: Marine Institute, Rinville, Oranmore, Co. Galway. Tel: 091 387 200, Fax: 091 387 201, Email: institute.mail@marine.ie

**MARINE SURVEY OFFICE
STAND 43**

The Marine Survey Office (MSO) is part of the Maritime Safety Directorate (MSD). MSO is responsible for the implementation of all national and international legislation in relation to safety of shipping and the prevention of pollution of the marine environment from ship-based sources.

The office carries out the initial approval of designs and drawings for new vessels or modifications to existing vessels and then carries out the surveys necessary for the certification of those vessels. In addition, it provides both a host of ancillary and back-up services to the shipping industry, the Department of Transport, and different Government Departments as well as the technical representation at relevant international meetings.

Contact Department of Transport: Tourism and Sport, Leeson Lane, Dublin 2. Tel: 016783400, Email: MSO@dtas.ie, Web: www.dttas.ie/maritime/

**MARPORT
STAND 95**

Marport develops, manufactures and sells instrumentation for the control of fishing gear (trawls and seines). Marport sensors utilize innovative wireless communication technology through high-speed ultra-sound, enabling efficient and fast control of the fishing gear. Moreover their design based on a single platform and software adapted to each specific function brings a great flexibility of evolution and

maintenance. These sensors are fully serviceable in Ploemeur (France) Marport office.

The configuration and programming of the sensors is via Bluetooth, which brings a great flexibility of use according to the seasonal practices. The Marport wideband receivers can be connected to 3 or 6 hydrophones depending on the model (M3 or M6), the latter listening simultaneously to the set and individually selecting the best signal. These receivers can be connected to different market standards, avoiding hull work during an evolution. The configuration and programming of the sensors is via Bluetooth, which brings a great flexibility of use according to the seasonal practices.

**MC DONNELLS (QUEEN ST) LTD
STAND 34**

The New Edition of our "FISH INDUSTRY CATALOGUE" will be available from the Stand. This Catalogue provides a comprehensive list of products, which best suit the Fish Industry. The emphasis is on Processing and Retailing, which mirrors trends in the industry.

Our Stand will feature a greater variety of Products, including HACCP colour coded Brushes and Squeegees, chainmail Gloves and Aprons, Rubber Aprons and Cutting Boards. We will also be demonstrating the many ways available to keep Knives super sharp, from Sharpening Machines to, safe and easy to use Rapid Steels.

There will be special offers and a full range of F. Dick products on display. Enter our FREE COMPETITION on the Stand.

Contact Tel: 01 6778123, Email: sales@mcdonnells.ie, Web: www.mcdonnells.ie

MEDLEY POTS STAND 83

Medley Pots have been at the forefront of manufacturing fully rigged crab/lobster and prawn pots for over 40 years. We also supply a wide range of 8mm or 10mm steel frames for home completion. Our fully rigged range of pots will be on display, including our new "Velvet parlour" based on the frame design of our ever successful prawn parlour.

All our pots now feature our extra heavy 3mm x 40mm black bait bags. Slit film rope is used to bind the tops of the pots, which we have in tests by our customer lasts far longer than the older "hard mono" type rope we used.

Our ever popular plastic base double soft eye creels, aimed at the larger offshore crabbing vessels and these are proving very successful all around Scotland and the UK. These feature our 12mm top frames and 14mm base bars to give the creel strength where it's needed for self shooting and gunnel roller hauling arrangements. Our catch protection plastic bases "inside" the pots bottom further enhancing catch quality.

We look forward to meeting you to discuss your requirements. We pride ourselves on innovative design and high quality products, offered with competitive delivery prices to Ireland.

THE FISHERMEN'S MISSION STAND 105

Providing a lifeline of welfare and support to fishermen and their families.

Our Work at The Fishermen's Mission is the only fishermen's charity that provides emergency support alongside practical, financial, spiritual and emotional care. We help all fishermen, active or retired, and their families.

If you're a fisherman and you need our help, please contact the Northern Ireland office on 0044 (0)28 417 69000, Mobile numbers 0044 (0)7710389298/0044 (0)7761718071.

THE FRESH FISH DELI STAND 97

We offer fantastic seafood products with a minimum of fuss. Our goal is to make life easier for fish lovers, offering delicious, sustainable options that are ready in minutes. We're offering decent, honest food, free from pretension and artificial flavours. We are, after all, seafood people.

It came together when we set up The Fresh Fish Deli a few years back in West Cork, where they know their fish and like their food. It's already a big hit with the locals. If you want to know what we're like, just bite into one of our products. The Fresh Fish Deli products are available in Super Valu nationwide.

TOM HAND ELECTRONICS STAND 63

Tom Hand Electronics was established in Dingle in 1986, and is going from strength to strength over 32 years later. The company are suppliers of a wide range of professional marine electronic equipment from major suppliers such as Kaijo-Denki, KNS, Intellian, Marport, Sailor, JRC, Koden, Simrad, Soden, lcom, etc. Recent installations include the majority of the electronics packages for the new MFV Fiona III, as well as many other smaller contracts. A popular product over

recent years is VSAT, or internet at sea. We supply either Ku or Ka band systems at very competitive rates. We also supply the complete range of low, medium, and high frequency sonars manufactured by Sonic, Kaijo-Denki. These sonars are top performers at a reasonable cost, being the sonar of choice by MFV Fiona K III, MFV Aine, MFV Oileán Oir and MFV Rachel Jay, as well as a number of new Scottish vessels, such as the Kings Cross and the Pathway.

The most recent addition to the Kaijo-Denki range is the world first compact Omni sonar, the KCS-60, specially designed to fit into an 8" seachest. The KCS-60 is fully stabilised with 512 separate transducer elements, at 60 Khz, for a clear sharp picture. The first KCS-60 installation in Ireland was on the MFV Oileán an Oir for Stevie Joyce.

Contact Tom Hand Electronics: Dingle, Co. Kerry. Tel: 0862547512, Email: tomhand@iol.ie, Web: www.tomhandelectronics.com

TYSONS SHIP RIGGERS STAND 08

Tyson's of Grimsby have attended the show every year since the show started in 2004. Tysons business has increased as a direct result of exhibiting in Galway. WESTWARD SCANIA STAND 13

Scania's marine engine platform provides customers with opportunities to enhance efficiency, operating economy and environmental performance - without sacrificing power. In an age where fuel consumption, reduced emissions and maximising economy of power has become such a vital part of the operation of working boats, Scania is leading the way with their range of 9, 13 & 16 litre marine engines.

Westward Scania, the importer for Scania products in Ireland, based in Strokestown, Co. Roscommon, with no fewer than ten dealerships geographically located to service the main ports and transport centres. Although the Scania name is perhaps more commonly associated with trucks & buses, Scania's engine division remains a busy part of Westward Scania's operation with the range of marine, industrial and power generation engines in constant demand.

The Scania engine range includes marine engines from 250hp to 1150hp in 9, 13 and 16 litre models. Engines for marine auxiliary power are also available to suit the commercial marine sector with ranges from 199 kW to 640 kW. In addition, a full range of industrial engines, 275hp to 770hp and power generation engines 250 kVA to 700 kVA, 50Hz & 60 Hz are also available.

Contact Westward Scania, Strokestown, Co Roscommon. Tel: 071 9634500, Web: www.westwardscania.com

WHISPAIRE STAND 34B

Whispaire will be exhibiting their highly regarded range of TeaMate water boilers including the marine grade stainless steel version. Ideal as a fit and forget solution for providing hot drinks at sea, you will wonder how you ever managed without one. Also on display will be a range of quality inverters for providing onboard mains power and also battery-to-battery chargers designed to provide the best possible charging of house or leisure batteries. These units will ensure maximum battery life and fully charged batteries due to their advanced charge cycle.

Contact Whispaire: Unit 53 Romsey Ind. Estate, Greatbridge Road, Romsey, Hants, SO51 OHR. Tel: +44 (0)1794 523999. Email: info@whispaire.co.uk, Web: www.whispaire.co.uk

ZIEGRA ICE MACHINES STAND 02

Ziegra's range of on board ice machines are widely regarded as the best in the world, due to the continuous improvement program implemented many years ago. But they will not rest on their laurels. The company continues to look for ways to make their machines even more robust and innovative, so that they will remain the No 1 choice for ice machines at sea. Members of the Ziegra technical sales team will be on hand at the show to discuss any requirements for land or on board ice machines.

Contact Ziegra Ice Machines: 2 Phoenix Court, Whitehill Ind. Est. Stock - port, Cheshire, SK4 1PQ. Tel: 00441614290525, Email: ice@ziegra.co.uk, Web: www.ziegra.co.uk
